

Web Project

To create a small website using newly learned web design skills to demonstrate the design principles and practices of web design that you've learned throughout the semester.

Checkpoints

Stage 1: Conceptualization and Analysis (Due Date: March 13, 2019)

Stage 2: Design (Due Date: March 13, 2019)

Stage 3: Production (In lab)

Stage 4: Presentation/Hand in Final Project (May 6 & 8, 2019)

Project Requirements

- Create a **fictional** website
- Should be a minimum of **six (6)** pages. Each page must contain appropriate page titles and appropriate content that provide information and value to the target audience.
- You should have an external style sheet that controls all of the presentational elements.
- Create your **own logo** and favicon for the website
- Incorporate design elements covered in class
- Should be mobile responsive
- Websites should render well in: Firefox, Chrome and Internet Explorer/MS Edge (Current Versions)
- Original Design
- Website should be optimized to load efficiently
- Web Design Best Practice Checklist – Use for Final Grading of website: **pages 233-234**

Content Requirements

- Home Page(index.html)
- Contact Page(contact.html) with **form validation** and **thank you page** after form is submitted
- Create additional pages for the website with your main materials.

Resources

Fonts: Use free Google Fonts

Graphic Resources: [Public Domain Pictures Only](#)

I will place links on Blackboard to different resources to help with the completion of your project.

Coding:

Use HTML5 and CSS3

Final Requirements:

Hand in project (Do not place project online)
